Medical
Soth.

INDEX

A

Abdominal operations carried out under percaine sub-arachnoid block 166, 168
——— surgery, choice of an anæsthetic for (H. Finsterer) 143
——— ——— importance of anæsthesia in 143
——— ——— splanchnic block in, how effected 15
——— wall, anæsthesia of, production of 152
——— ——— ——— ——— in addition to spinal anæsthesia 152
Abstracts 89, 132, 180
Adrenalin, combined with novocain, use in spinal anæsthesia 160
——— intracardiac injection of 73, 74
——— ——— ——— ——— views of writers summarized 74
"Aeris," allonal and (H. Bellamy Gardner) 84
——— substitution of term for that of nitrous oxide (H. Bellamy Gardner) 84
Air, cannot be given continually with nitrous oxide 32
——— complemental 22, 23, 27
——— residual 23
——— supplemental 23
——— tidal 22, 23, 27
Air-passages, growths higher up in, method of removal 130
Alkalosis, temporary, causing tetany under anæsthesia 170
Allonal, use of before administration of nitrous oxide gas (aeris) (H. Bellamy Gardner) 84
Alpha-lobeline, intra-muscular injection of, when necessary 37
Amenorrhœa, chronic treatment during state of hypnosis 111
Amytal as basal narcotic 42
——— for children (Mary Botsford) (abstract) 90
Anæsthesia, general, use of eserine for regulating (Garrelon: abstract) 90
——— local, in abdominal operations 152
——— ——— most commonly used drug for 160
——— resuscitation during (Sir Francis E. Shipway) 69, 93
——— system of, for dental anæsthetist (F. P. de Caux) 22
Anæsthetic, choice of, for abdominal surgery (H. Finsterer) 143
——— fatalities 96
——— ——— statistics relating to 82
Anæsthetics, administration and teaching of, outside London 81
——— administration of, simplicity in (R. W. Hornabrook: letter) 185
——— importance of instruction in, to medical students 175, 176
——— post-graduate instruction in, Fellowship of Medicine and (M. Davidson: letter) 188
——— teaching of, difficulties regarding 57
——— ——— hindrances to 177
Anæsthetists for hospital and teaching posts, standard of knowledge to be acquired by 177
——— position of in United States (editorial) 97, 98
——— worries of 57
Analgesia and paralysis, extent upward compared 9, 10
——— general, produced by introduction of novocain into lumbar region 13
——— only produced by former administration of nitrous oxide 24
Analgesic, direct injection of, without withdrawing cerebro-spinal fluid, method described 16, 17

Analgesics, graded effect on mixed nerves 10
——— gravitational diffusion of, ... 9, 10, 13, 15
——— intra-thecal administration, principal danger of 13
——— methods of spreading over roots from lumbar region 15
Ankle, severe injury to, effect of hypnosis on pain following operation for 119
Anoxæmia 12, 27
——— definition of 24
Apnœa, cause of 172
——— stage of, in asphyxia under gas anæsthesia 25
Arachnoid membrane, consistency of 3
Artificial respiration with massage of heart 73
Asphyxia, cyanosis without 24
——— definition of 24
——— neonatorum, blue and white, resuscitation from 78
——— signs of, under gas anæsthesia 24, 25
Association of Anæsthetists (editorial) 14
——— ——— establishment of 178
Atropa mandragora root of, narcotic effect of 108
Atropine as drug for premedication before gas and oxygen, objection to 35, 36
Attention, movements of eyes in relation to 117, 118
Auricles, cardiac, puncture of 75
Avertin anæsthesia, blood-pressure in (Taylor and Hunt: abstract) 182
——— as basal narcotic 42, 46
——— ——— illustrative cases 47
——— combination with gas-oxygen (Professor Demerest: abstract) 182
——— -ethylene anæsthesia (H. B. Neff: abstract) 183
——— in surgical anæsthesia (F. B. Gurd and Wesley Bourne: abstract) 90
——— intoxication, detoxication properties of sodium thio-sulphate in (A. Bolliger: abstract) 180
——— pharmacology of (Raginsky and Wesley Bourne: abstract) 135
——— premedication value in relation to nitrous oxide anæsthesia (abstract) 91
——— use of in abdominal operations 150, 151

B

Babcock, lightening a solution by addition of alcohol 7
Barbital poisoning, treatment with glucose (abstract) 134
Barbiturates, as basal narcotics 42, 50
——— ——— administration of 51, 52
——— ——— illustrative cases 53
——— ——— stages of hypnotic state resulting from 51
——— elimination of 51
Barbituric acid, derivatives, premedication values in relation to nitrous oxide anæsthesia (abstract) 91
Barbotage or replacement method, 16. *See also* Cerebro-spinal fluid, withdrawal and addition of drug before reinjection.
Barker, A. E., experiments on spinal analgesia (quoted) 5, 6
Barnsley, A.: Anæsthesia in the tropics (abstract) 181
Blood-pressure, fall of, after injections of percaine solution 166
———in avertin anæsthesia (Taylor and Hunt: abstract) 182
——— -supply to medullary centres, means of effectually securing 5
Bolliger, A.: An experimental theory of the detoxicating properties of sodium thio-sulphate in avertin intoxication (abstract) 180

Botsford, Mary: Amytal for children (abstract) 90
——— ——— position of anæsthetists in United States 98
Bourne, Wesley, and Raginsky: pharmacology of avertin 135
Boyle's continuous flow apparatus for nitrous oxide anæsthesia 28
Braid, James (1795–1860), first practice of hypnotism by 106
Brain-cells, path of entrance of strychnine to 14
Breathing, forced, of 20 minutes; supervention of tetany after 173
British Medical Association, Section of Anæsthetics: Centenary Meeting, (London 1832) 137

C

Cabot, Hugh (and others), Sodium amytal, analysis of intravenous use in 132 operations (abstract) 182
Carbon dioxide and oxygen mixtures (abstract) 91
——— ——— inductions, danger of (R. W. Hornabrook: letter) 186
——— ——— percentage necessary for resuscitation 70
——— ——— rebreathing of, abolishing tetany 170
——— ——— resuscitation with 70, 71
Casual comments 80
——— ——— ether convulsions 126
——— ——— risks of premedication 127
de Caux, F. P., a system of anæsthesia for the dental anæsthetist 22
Cerebro-spinal fluid, amount in sub-arachnoid space 163
——— ——— as solvent of novocain crystals 7
——— ——— effect of addition to spinocaine and durocaine to 7
——— ——— secretion of, how effected 4, 5
——— ——— withdrawal, and addition of drug before re-injection 16
Charcot's views regarding hypnotism 111
Cherbourg Hospital, surgical operations performed at, under mesmeric state..... 104
Childbirth, normal: abolition of pain in (J. Frigyesi: abstract) 89
Chloroform, administration of, method of hypnosis combined with 114
——— anæsthesia, death from injury to liver following, in abdominal operation 146
——— ——— light, primary circulatory arrest, due to ventricular fibrillation, occurring during 77
——— ——— case of 77
——— and liquid paraffin, specific gravity beads of 59, 60
——— as anæsthetic in removal of malignant growth in hypopharnyx 129, 130
——— in abdominal operations 144
——— ——— danger of 144
——— introduction of (1847) 107, 109
——— new clinical work on, detailed by Dr. R. W. Hornabrook 89
——— original clinical method of giving in definite percentage dosage (S. Thompson Rowling) 59
——— vaporisation of, how obtained 60, 61
——— ——— with nitrous oxide 61, 62
——— vaporised, advantages of 65
——— ——— advantages over nitrous oxide alone as preliminary anæsthetic ... 64
——— vapour, clinical administration of 61, 62
——— ——— proportions of percentage in anæsthetic mixtures causing sudden death 125
——— ——— ——— percentage in anæsthetic mixtures incapable of seriously affecting heart 125
Circulatory arrest, primary, due to ventricular fibrillation during light chloroform anæsthesia 77

Cisterna basalis 4
——— magna 4
——— pontis 4
Clayton Aniline Company, solution of percaine prepared by 163
Cloquet, Jules, operation performed by, with patient under influence of mesmerism 100, 101
Cocain, gravitational diffusion of 9
Colledge, L., discussion on anæsthesia for major throat operations 131
Confinements, application of hypnosis in 121
Coramin, use of in connection with avertin anæsthesia (H. Widenhorn: abstract) 183
Correspondence 139, 140, 185
——— encouragement of (casual comment) 81
Cushny, on cause of relative non-toxicity of novocain 12
Cyanosis, without asphyxia 24

D

Daly, Ashley, ether convulsions: a note as to treatment 67
Davidson, Maurice: the Fellowship of Medicine and post-graduate instruction in anæsthetics (letter) 188
Davy, Sir Humphry, first suggestion of nitrous oxide as anæsthetic 108, 109
Demerest, Professor, *L'anésthésie à l'avertin et au protoxyde d'azote-oxygène combinés* (abstract) 182
Dental anæsthetist, system of anæsthesia for (F. P. de Caux) 22
——— chair, management under anæsthetics of out-patients operated upon in ... 30
——— in-patients, preparation for operation 35
Dentistry, application of hypnosis in 120
Diathermy, anæsthesia for (H. W. Featherstone) 92
Diothane as a new local anæsthetic (V. H. Rider and E. W. Scott: abstract) 183
Diploma in anæsthetics 141
Dorsal roots, clinical significance in spinal anæsthesia (A. L. Willinsky: abstract) 132
Durocaine, administration of, fallacies underlying 8
——— specific gravity of 7
——— spinal anæsthesia under 7
——— ——— posture adopted 7

E

Ecstasy, definition of 112
Editorials: Self-experimentation with anæsthetics 1
——— Anæsthetists' worries 57
——— Position of anæsthetists in United States 97, 98
——— Association of Anæsthetists—Diploma in Anæsthetics 141
Eichholtz, Professor, introduction of avertin by 42
Elliotson, John, (1791–1868): Practice of mesmerism by 102
Embolism and thrombosis, post-operative, prevention of (abstract) 89
——— pulmonary, deaths from, partially due to ether anæsthesia 148
Endoscopy, anæsthesia for (H. W. Featherstone) 92
Endotracheal administration of nitrous oxide with oxygen from cylinder 29
——— anæsthesia, in operations for growths higher in air passages 130, 131
Epidural (sacral) anæsthesia 158
Esdaile, James, (1808–1859), application of mesmerism by, in performance of surgical operations in India 104, 105
Eserine, use of for regulating general anæsthesia (Garrelon: abstract) 90
Ether air mixtures, inflammability of (J. D. Morgan) 92
——— anæsthesia, deaths from atony of the stomach following 146, 147
——— ——— deaths from injury to liver following, in abdominal operations ... 146

Ether anæsthesia, deaths from thrombosis and pulmonary embolism partially due to 148
——— ——— in abdominal operations 144
——— ——— ——— immediate fatalities infrequent 145
——— ——— intravenous, danger of 148
——— ——— operations under, followed by peritonitis 148
——— ——— ——— followed by pneumonia 148
——— ——— tetany during (W. N. Kemp) 169
——— ——— ——— references 174
——— convulsions 126, 127
——— ——— note as to treatment (Ashley Daly) 67
——— ——— suggested causes of 126
——— table showing time taken to produce third stage of anæsthesia in all animal subjects when mixtures of ether vapour and air are used 125
Ethyl chloride anæsthesia, deaths from 149
——— ——— anæsthesia, preliminary to ether administration 149
——— ——— ——— results of 149
Expiration, exaggerated, during asphyxia under gas anæsthesia 25
Eyes, movements of, in relation to attention 117, 118

F

Fairlie, H. P., percaine sub-arachnoid block 162
Faraday, Michael, suggestion of stupefying effect of ether by 108
Featherstone, H. W., anæsthesia for diathermy and endoscopy 92
Fellowship of Medicine and post-graduate instruction in anæsthesia (M. Davidson: letter) 188
Ferguson, W. K., and Marsh, J. P., observations on experimental spinal anæsthesia (abstract) 180
Ferrier, Sir D., movements of eyes in relation to attention 118
Finsterer, Prof. H., the choice of an anæsthetic for abdominal surgery 143
France, revival of hypnotism in 110
Frigyesi, Prof. J., abolition of pain in normal childbirth (abstract) 89

G

Gall-bladder, operation on, fatal cases of liver injury following 146
——— operations on, use of posterior splanchnic anæsthesia in 153, 156
Gardner, H. Bellamy, allonal and aeris 84
Garrelon, the use of eserine for regulating general anæsthesia (abstract) 90
Gas oxygen apparatus, combustion in (G. Ramsey Phillips) 93
Germany, revival of hypnotism in 110
Gliadine 7
Glucose, treatment of barbital poisoning with (abstract) 134
Goldberg-Whyte, H., and Aubrey Radford, high and low spinal anæsthesia (abstract) 132
Gravitational diffusion of analgesics 9, 10, 13, 15
Gurd, F. B., and Wesley Bourne, avertin in surgical anæsthesia (abstract) 90
Gwathmey, diffusible and non-diffusible solutions 6, 7
——— his continuous flow apparatus for nitrous oxide anæsthesia 28
——— production of narcosis by rectal oil-ether solution (quoted) 41

H

Haemoglobin 24
Hallauer, method of hypnosis combined with chloroform administration 114
Hansen, practice of hypnotism by 109, 117
Head-anæsthesia, production of, sleep resulting from 13

Head and neck, operations on, spinal analgesia contra-indicated in 20
——— and thorax, operations on, spinal injections for, followed by respiratory embarrassment 14
Heart disease, hypnosis in cases of 122
——— ——— spinal analgesia contra-indicated in 19
——— massage of (kneading or compression) 72, 73
Heidbrink, continuous flow apparatus for nitrous oxide anæsthesia 28
Heidenhain, advances in hypnotism made by 110
Henderson, L. J., chemical reaction upon which H-ion concentration is dependent 171
Hering-Breuer phenomenon 69, 70
Hewer, C. Langton, discussion on resuscitation 95
Hickman, Henry Hill, anæsthetic discoveries of, neglected by contemporaries... 108
H-ion (*p*H) concentration, chemical reaction upon which dependent 171
——— concentration of fluids bathing tissues 170, 171
Hollander, Bernard, hpynosis and anæsthesia 99
van Hoogstraten, E. G., recent advances in spinal anæsthesia (abstract) 133
Hornabrook, R. W., danger of carbon dioxide inductions (letter) 186
——— simplicity in administration of anæsthetics (letter) 185
——— some new clinical work on chloroform detailed by 87
——— views regarding ether-convulsion (quoted) 126
——— views regarding risks of premedication (quoted) 127
Hunt and Taylor, blood-pressure in avertin anæsthesia (abstract) 182
Hyman, puncture of ventricle and auricles 75
Hyoscine A, or Hyoscine B, compound, as drugs, for premedication of dental in-patients 36
Hyperpnœa, stage of, in asphyxia under gas anæsthesia 25
Hypnosis, absence of sensation of pain inflicted in subjects of 118
——— advantages of summarised 121, 122
——— application in confinements 121
——— ——— in dentistry 120
——— ——— in surgery revived 121
——— case of instantaneous cure following 120
——— definition of 106
——— effect on pain in various diseases and injuries 119, 120
——— in cases of heart disease 122
——— induction of 115, 116
——— method of, combined with chloroform administration 114
——— practice of 112, 113
——— sick people more readily the subjects of 119
Hypnotism, modern, first development of 99
——— practice of, by Braid 106
——— practice of, in antiquity 99
——— relationship of suggestion to 110
——— revival of 109, 110
Hypopharynx, malignant growths in, methods adopted for ensuring anæsthesia during operation for 129

I

Inhalation-anæsthesia by a gravitational method (H. H. Miller: abstract) 183
Inspiration, exaggerated, during asphyxia under gas anæsthesia 25
Intracardiac injections of drugs 73
Intra-dural caudal block, limited, production 18, 19
Isopral ether anæsthesia, intravenous 149

J

Jactitation, during asphyxia under gas anæsthesia 25
Jones, W. Howard, percaine as a spinal anæsthetic (quoted) 162
——— sub-arachnoid block; general anæsthesia; respiratory paralysis; fallacies and methods 3
Jonnesco, method of puncture adopted by 14

K

Kappis, method of posterior splanchnic anæsthesia 153, 154
Kemp, W. N., tetany during ether anæsthesia 169
Kensole, H. H., discussion on resuscitation 94
Koster, experimental application of novocain solution to upper cervical cord 10
——— sleep resulting from production of head-anæsthesia 13

L

Lapis memphiticus, narcotic effect of 108
Laryngotomy, preliminary, for growths higher up in air passages 130
Larynx, entire removal, method of anæsthetisation to be adopted in 131
Liébeault, Dr., suggestion and hypnotism 110
Liver, deaths from injury to, following chloroform anæsthesia in abdominal operations 146
——— deaths from injury to, following ether anæsthesia in abdominal operations 146
——— grave injury to, from chloroform in abdominal operations 144
Lubafax, as lubricant to nostril 38, 39
Lumbar region, introduction of novocain into, producing general analgesia 13
——— ——— nerve roots from, methods of spreading analgesia over 15
Luminal as basal narcotic 42
Lung complications following operation for malignant disease of hypopharynx 129, 130

M

McIlroy, Dame L., discussion on resuscitation 93
Mackenzie, J. Ross, modern anæsthetics, the teaching hospital, and the undergraduate 175
McKesson's intermittent flow apparatus for nitrous oxide anæsthesia 29
Macleod, H-ion (*p*H) concentration of fluids bathing tissues 170, 171
Magill, I. W., discussion on anæsthesia for major throat operations 131
——— discussion on resuscitation 95
——— introduction of amytal and nembutal as basal narcotics by 42
Magnetism, animal, practice of, by Mesmer 99, 100
——— ——— *see also* Mesmerism
Malignant growths in hypopharynx, methods adopted for ensuring anæsthesia during operation for 129
Marston, Christopher C., remarks on anæsthesia and analgesia 124
Massage (kneading or compression) of heart 72, 73
Mastoid operation, effect of hypnosis on pain following 120
Medical students, importance of giving instruction in anæsthetics to 175, 176
Medullary centres, means of securing good blood supply to 5

Mesenterial anæsthesia 152
——— ——— advantages of 152, 153
Mesmer, F. A., (1734–1815), practice of animal magnetism by 99, 100
Mesmerism, extraction of teeth under 101
——— practice of, why displaced 107
——— surgical operations performed under 100, 101, 102, 103
Miller, H. H., inhalation anæsthesia by a gravitational method (abstract) 183
Minnitt, R. J., discussion on resuscitation 94
Morphia and atropine as drugs for premedication in exceptional dental cases ... 37
Morphine, with atropine or scopolamine, preliminary administration before ether in abdominal operations 145
——— preliminary injection before local anæsthesia in abdominal operations ... 152
Morris, C. W., discussion on anæsthesia for major throat operations 129

N

Nancy school of hypnotism, methods of 110, 111, 116, 117
Narcosis, basal—*see* Premedication
Narcotic vapour and air, mixtures containing different percentages of distinct anæsthetics 124
Narcotics, internal medication by, to prevent pain in surgical operations, ancient knowledge of 108
——— respirable, administration by precise methods essential 124
Nasal administration of nitrous oxide with oxygen from air or cylinder 29
——— endotracheal gas and oxygen administration 38, 39
Nausea following injection of novocain 12
Neff, H. B., avertin ethyline anæsthesia (abstract) 183
Nembutal as basal narcotic 42, 51, 52
——— as drug for premedication of nervous dental patients 37
Nerve fibres, strychnine without action on 14
——— roots, area in brain where easiest affected by analgesic solutions 4
——— ——— from lumbar region, methods of spreading algesic over 15
Nerves, mixed, graded effects of analgesics on 10
Nervous system, results obtainable on, by injection of analgesic substances within sub-arachnoid space, summarised 3
Newly-born, resuscitation of (Sir Francis E. Shipway) 69, 93
Nitrogen, displacement from blood more quickly effected by nitrous oxide alone 26
——— elimination from body and replacement by nitrous oxide 24
Nitrous oxide, administration of, formerly producing analgesia only 24
——— ——— administration by endotracheal method 29
——— ——— administration by nasal method 29
——— ——— administration methods, a knowledge of which requisite to dental anæsthetist 29
——— ——— air cannot be given continuously with 32
——— ——— all-round value as anæsthetic 22
——— ——— alone, displacement of nitrogen from blood effected more quickly by 26
——— ——— anæsthesia apparatus 28
——— ——— anæsthesia apparatus, continuous flow 28
——— ——— anæsthesia apparatus, intermittent flow 28
——— ——— anæsthesia, basic principle employed in 25, 26, 27
——— ——— anæsthesia in abdominal operations 150
——— ——— anæsthesia, induction of, in case of patients in dental chair..... 31, 32
——— ——— anæsthesia, knowledge of sufficient for dental student 26

Nitrous oxide anæsthesia, premedication values of barbituric acid derivatives and avertin in relation to (abstract) 91
——— ——— anæsthesia, signs the same irrespective of source of oxygen 26
——— ——— and oxygen, administration during dosage with percaine solution 167
——— ——— and oxygen, combination of avertin with (Professor Demerest: abstract) 182
——— ——— and oxygen, nasal endotracheal administration of, to dental patients 38
——— ——— percentage re-breathed by patient 23
——— ——— substitution of term ' æris ' for that of (H Bellamy Gardner) 84
——— ——— when first suggested as anæsthetic 108
Novocain, combined with adrenalin in local anæsthesia, dosage 160
——— ——— most commonly used drug for local anæsthesia 160
——— crystals, cerebro-spinal fluid as solvent of 7
——— in saline solution, direct injection, method of 18
——— injection of, followed by nausea and vomiting 12
——— introduction into lumbar region, producing general analgesia 13
——— relative non-toxicity of, explained 12
——— solution, experimental application to upper cervical cord 10, 11
——— ——— requisite for use in splanchnic anæsthesia 155
——— spinal anæsthesia under 8
Nurse anæsthetists, limitations of (editorial) 97

O

Obituary—Phillips, Hugh R., M.D. 142
Oil-ether solution, rectal, production of narcosis by 41
Omnopon and scopolamine as drug for premedication of dental patients, how to get full effect of 38
——— as drug for premedication of dental in-patients 36
Operating-table, management of dental in-patients operated upon 34
Operative shock, deaths from, following abdominal operations 145
Oxygen, addition to chloroform, in operation for malignant disease of hypopharynx 130
——— mixtures, carbon dioxide and (abstract) 91
——— nitrous oxide anæsthesia the same irrespective of source of 26
——— not too much and not too little to be given with nitrous oxide 33
Oxyhæmoglobin 24

P

Pain, abolition of, in normal childbirth (J. Frigyesi: abstract) 89
——— ——— in surgical operations formerly discountenanced 103, 108
——— during operation, prevention by narcotics in ancient days 108
——— inflicted, absence of sensation of in subjects of hypnosis 118
Pantocain (H. Schmidt: abstract) 135
Pantopon, preliminary injection, before local anæsthesia for abdominal operation 152
——— with atropine or scopolamine, preliminary administration before ether in abdominal operations 145
Paraffin, liquid, and chloroform, specific gravity beads of 59, 60
Paraldehyde as basal narcotic 43
——— ——— ——— illustrative cases 44
——— rectal, as basal narcotic 42

Paralysis and analgesia, extent upward, compared 9, 10
Parasacral anæsthesia 157, 158
——— ——— combined 160
——— ——— operations for which used 157, 158
Paravertebral anæsthesia, indications and contra-indications for 157
Percaine, as local anæsthetic 160, 161
——— chemistry of 162
——— solution of, addition to cerebro-spinal fluid after withdrawal and before re-injection 16
——— ——— dilute, and other spinal anæsthetics, essential difference between 163
——— ——— hypobaric, direct injection 16, 17
——— ——— hypobaric, direct injection, posture of patient during 17
——— ——— hypobaric, direct injection, relaxation obtained by 18
——— ——— in production of limited intra-dural caudal block 19
——— ——— dosage 164, 166
——— ——— duration of anæsthesia 164
——— ——— injection, classification of operations carried out under 166, 168
——— ——— injection, fall of blood-pressure under 166
——— ——— injection, point at which to be made 166
——— ——— injection, position of patient in 165
——— ——— injection, use of gravity in 165
——— ——— prepared by Clayton Aniline Company 163
——— ——— strengths permissible 162, 163
——— sub-arachnoid block (H. P. Fairlie) 162
Peritonitis, operations under ether anæsthesia followed by 148
——— post-operative, risk of 144
Pernocton anæsthesia (R. Pfeiler: abstract) 135
——— as basal narcotic 42, 51, 52
——— use of in abdominal operations 151
——— ——— risk of, and fatalities from 151
Pfeiler, Richard, pernocton anæsthesia (abstract) 135
Phillips, G. Ramsey, combustion in a gas oxygen apparatus 93
Phillips, Hugh R. (M.D.), obituary 142
Pia mater spinalis, layers of 4
Pitkin, lightening a solution by addition of alcohol 7
Pituitrin, addition to novocain, instead of adrenalin, in local anæsthesia when necessary 160
Pneumonia, operations under ether anæsthesia followed by 148
——— post-operative, comparative rarity of 128
——— ——— avoidance of 130
Post-graduate instruction in anæsthetics, Fellowship of Medicine and (M. Davidson: letter) 188
Premedication (S. Rowbotham) 41
——— history of method 41
——— of dental in-patients 35
——— risks attending 127
——— values of barbituric acid derivatives and avertin in relation to nitrous oxide anæsthesia (abstract) 91

Q

Quarella, administration of scopolamine and morphine under method of barbotage or replacement 16
——— advantages of percaine (quoted) 162, 163
